DETAILED ACTION

Preliminary Amendment received on December 09, 2005 has been acknowledged.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Zalewski et al (US 6,771,981).

Re claims 1-4, 6-11, 13-19, 21-24, 26-31 and 33-39: Zalewski discloses that a user may use mobile station 104 to send request for room SMS or the like to a central reservation site to reserve a hotel room. Central reservation site may send return SMS or the like comprising with room number, ID code, directions and other information. User may then proceed directly to room bypassing desk clerk. User then may place mobile station close to door lock which comprises an interrogator. Lock interrogates cover 100 col 16, lines 36-45). Such disclosure teaches facilitating a user in providing an instruction to a mobile communication device to output a first data in a form of a first radio frequency signal to emulate output of the first data by an active RFID transponder. Zalewski discloses that the cover responds with code received from central reservation site. Thus door is unlocked (col 16, lines 45-47). Such disclosure teaches in response,

outputting the first data in the form of a radio frequency signal, emulating output of the first data by an active RFID transponder as instructed by the user. Fig. 10 shows the communication between two mobile stations in accordance with the invention (col 6, lines 24-25). Such figure and disclosure teaches that the mobile communication device being equipped to facilitate a user in communicating with a user of another communication device, with the communication being facilitated at least in part over a wireless network.

Re claims 5 and 25: Zalewski further discloses that by means of a mobile station equipped with a suitable application module the user can make payments in a shop using hi/her credit account (col 5, lines 35-40).

Re claims 12, 20, 32 and 40: Zalewski shows in Fig. 6 a wireless mobile phone 104.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vanska et al, U.S. Patent Application Publication No. 2004/0093274 A1, discloses method and apparatus for making daily shopping easier.

Beckmann et al, U.S. Patent No. 5,957,99, discloses radio navigation emulating GPS system.
